

Wales

Valuing Our Environment

- Reducing our ecological footprint
- Making sustainable and integrated use of resources and minimisation of waste
- Ensuring development respects environmental capacity, local distinctiveness and cultural diversity
- Increasing energy efficiency and utilising renewable energy sources
- Responding to potential impacts and minimising our contribution to climate change
- Promoting tourism which respects the environment and cultural heritage

Respecting Distinctiveness

Building Sustainable Communities

- Creating diverse, safe and healthy communities that have the capacity to adapt to the future
- Increasing economic activity rates and social inclusion
- Strengthening relationships between places
- Fostering a Welsh language which is relevant to communities throughout Wales
- Promoting strong civic leadership, efficient public services and effective public participation

Achieving Sustainable Accessibility

- Promoting environmentally friendly and efficient transport
- Improving links to global transport hubs
- Providing access to social and economic opportunities appropriate to the needs of the area
- Creating an accessible public sector
- Strengthening ICT to provide access to services and increase economic and social opportunities

Increasing and Spreading Prosperity

- Promoting sustainable economic growth
- Creating balanced economic development and improved competitiveness
- Supporting a skilled, adaptable and motivated workforce
- Enhancing R&D and innovation to drive economic development
- Strengthening the economic development potential of HE and FE sector

Embracing the Future
